

Window sills

Performance Statement:	Windows sills are installed at a height that enables home occupants to view the outdoor space from either a seated or standing position.
Essential	No requirements.
Desirable	Window controls should be easy to operate with one hand and located within easy reach from either a seated or standing position. Window sills on the ground (or entry) level in living areas and bedroom spaces should be positioned no higher than 1000mm above the finished floor to facilitate natural surveillance.
